PROFESSIONAL SUMMARY

Program operations professional (B.A., Computer Science and Psychology) experienced in cross-functional program management, client and vendor management, and data-driven process improvement. Delivers concurrent workstreams across engineering, analytics, and vendor stakeholders using Agile/Kanban, risk tracking, and SQL/Power BI KPI dashboards.

SKILLS

Program & Project Management: Cross-Functional Program Management, Project Planning, Stakeholder Management, Vendor Management, Risk Management, KPI Tracking, Budget Tracking, Status Reporting, Process Improvement, Agile, Scrum, Kanban
Product: Requirements Gathering, Business Requirements Translation, QA Coordination, Bug Triage, Data-Driven Decision Making
Tools & Technical: SQL, Power BI, Microsoft Excel (Advanced), Python, Salesforce, Smartsheet, Microsoft 365, Large Language Models (LLMs), Generative AI, Ollama, SolidWorks, CAD

PROFESSIONAL EXPERIENCE

Associate, Program Operations - November 2025 – Present
Element Fleet Management | Hopkins, MN

- Serve as primary point of contact for Amazon stakeholders on the Amazon Armada program, leading client conversations and coordinating deliveries and operational issues on Amazon fleet units through resolution; resolve Salesforce cases as needed.
- Manage 5+ concurrent cross-functional operational and technical workstreams across vendors, data analysts, and engineering stakeholders, achieving 100% on-time delivery through project planning, status reporting, and risk tracking.
- Analyze workflow bottlenecks and build KPI dashboards in SQL and Power BI, increasing cross-functional operational throughput by 20%.
- Directly manage two vendor relationships: lead weekly vendor performance meetings, present KPI data to stakeholders, and adjust work volume allocation based on vendor performance.
- Received the Accountability in Action award (August 2026) for balancing vendor relationships.

Technical Project Assistant - May 2018 – Present
JB's Landscaping and Lawn Care LLC | Kennewick, WA

- Serve as primary technical liaison for clients, gathering requirements and translating them into detailed project proposals, scopes, and timelines that meet documented business needs.
- Coordinate external vendors for materials and supplies, managing procurement timelines and keeping deliverables aligned with project requirements.

IT Support & Digital Media Intern - August 2024 – May 2025
St. Olaf College | Northfield, MN

- Provided technical support to students and faculty, identifying and resolving 50+ software and university application issues to maintain user productivity.
- Documented and triaged user-reported issues and bugs, escalating clear issue reports to the central IT department for follow-up and resolution.

Frontend Developer Intern - May 2024 – September 2024
GBCS Group | Remote (Alberta, Canada)

- Translated business requirements into actionable development tasks and coordinated a team of 4–6 developers to align project deliverables with stakeholder objectives.
- Coordinated cross-functional handoffs with engineering and QA teams across multiple concurrent projects to test for bugs, maintain project velocity, and ensure product quality.

EDUCATION

Bachelor of Arts, Computer Science and Psychology August 2021 – May 2025
St. Olaf College | Northfield, MN
Relevant Coursework: Machine Learning, Algorithms for Decision Making, Principles of Statistics, Hardware Design, Ethical Issues in Software Design, Industrial/Organizational Psychology

PROJECTS

AlphaPoker | Machine Learning Project

- Led a poker hand classification project: defined model evaluation goals, coordinated experimentation across decision tree and neural network approaches, and managed the end-to-end testing lifecycle using a UC Irvine dataset.

Garage Log | Personal Project

- Designed and built a desktop vehicle maintenance log app (github.com/weeef/garage).
