PROFESSIONAL EXPERIENCE

ELEMENT FLEET MANAGEMENT

HOPKINS, MN

Associate, Program Operations

November 2025 - Present

- Orchestrate 5+ concurrent operational and technical workstreams across vendors, data analysts, and engineering stakeholders, driving 100% on-time delivery.
- Conduct deep data analysis on workflow bottlenecks, authoring programmatic dashboards in SQL/Power BI to boost cross-functional operational throughput by 20%. Addressed Salesforce cases when needed.
- Directly manage two vendors, evaluating their performance and adjusting volume as their performance fluctuates.
- Supported the Amazon Armada program which included direct involvement with Amazon, and Amazon units.

JB'S LANDSCAPING AND LAWN CARE LLC

KENNEWICK, WA

Technical Project Assistant

May 2018 - Present

- Acted as the primary technical liaison for clients, translating user requirements into detailed project proposals and timelines to ensure business needs were fully met and documented.
- Coordinated with external vendors for materials and supplies, managing timelines and ensuring alignment with project requirements.

ST. OLAF COLLEGE

Northfield, MN

IT Support & Digital Media Intern

August 2024-May 2025

- Provided direct technical support to students and faculty, identifying and resolving over 50 technical issues related to software and university applications to ensure user productivity.
- Documented user-reported issues and bugs, effectively communicating technical problems to the central IT department for follow-up and resolution.

GBCS GROUP

REMOTE - ALBERTA, CANADA

Frontend Developer Intern

May 2024 - September 2024

- Translated business needs into actionable development tasks and coordinated with a team of 4-6 developers, ensuring project deliverables aligned with stakeholder objectives.
- Collaborated with engineering and QA teams on multiple concurrent projects, coordinating cross-functional handoffs to test for bugs, maintain project velocity, and ensure product quality.

EDUCATION

ST. OLAF COLLEGE

Northfield, MN

Bachelor of Arts - Computer Science and Psychology

August 2021 - May 2025

- Relevant Coursework:
 - Hardware Design, Machine Learning, Algorithms for Decision Making, Ethical Issues in Software Design, Principles of Statistics, Industrial/Organizational Psychology, Psychopathology

PROJECTS

AlphaPoker (Machine Learning Project)

- Led development of a poker hand classification project by defining model evaluation goals, coordinating experimentation across decision tree and neural network approaches, and managing the end-to-end testing lifecycle on a UC Irvine dataset.
